

Specialists in Pediatric Dentistry

500 S. Chinowth St. #201 Visalia, CA 93277

559-624-1177 Office 559-747-2370 Fax

Numbing Medicine

Your child's teeth, gums, lip, tongue, and cheek will *feel* numb (asleep/swollen) up to **3 hours** after today's dental treatment. Please watch your child carefully during this 3-hour period. Do not let them rub, scratch, pick or chew on their cheek, tongue, lip, or mouth.

*If left unmonitored, **your child might accidentally bite or chew their cheek, lip, or tongue** while the area is still numb, potentially causing soft-tissue injury, often resulting in severe swelling/pain when the numbing sensation wears off.*

PLEASE! PLEASE! PLEASE! Watch your child VERY CAREFULLY
